LILY BAIN
BATHROOMS & TILES

Belletto

A modern interior space featuring a wall with vertical wood slats. In the foreground, a dark brown leather sofa with a metal frame is visible. To the left, a large potted plant with broad green leaves sits on a dark surface. Two circular pendant lights hang from the ceiling, casting a warm glow. A semi-transparent white box with text is centered in the image.

Tile Collection

Our new collection for 2023 is consolidating our brand as a class leader. We hope that our range helps customers on their path to a beautiful home. We strive to make all information easily accessible and reassure you of the technical details of each product. We are increasingly aware of the environmental performance of our producers with the vast majority of our products now sourced from EU certified production facilities.

We hope our tiles help to enrich and differentiate your home.

Bodo Collection

Evolution is at the heart of the Bodo collection. Inside this creative collection we have elements of marble, granite and quartz. We distilled the pure aesthetics and re-imagined them as one tile. The result is Bodo. A beautiful creation that is an inspired evolution which sits equally well in homes and commercial spaces. It has movement and tonality on the surface with calmness and continuity underneath. As a final "piece des resistance", Bodo has been enhanced with Slip Stop glaze. The tiles are smooth to touch, but thanks to a patented glazing technique achieve superior slip resistant qualities. This collection performs equally well when wet as when dry, achieving a unique R10 slip rating for such a smooth tile. This Slip Stop glaze means the Bodo collection is both beautiful, slip resistant and easy to clean - Perfection! Bodo is initially available in three shades White, Grey and Beige with a matching ceramic wall in 900x330 (Non rectified).

Kliff Collection

Kliff is the collection where industrial robustness meets an aspect of natural stone. It's granite effect appears strong and timeless. Kliff comes in four shades Sand, Pearl, White and Greige, in a high quality coloured body porcelain that imbues the surface with superb shades and nuances. These colours provide a calm and sophisticated feeling to any space.

Mirage Collection

Mirage is a high gloss porcelain tile that has been inspired by the beautiful onyx marbles. The large patterns and movement are at once recognisable as the singularly beautiful traits of these precious stones. Mirage comes in 1200x600 rectified porcelain which can be fitted tightly together with a 2mm joint to maintain the cut marble effect. Mirage is intended to be used both as a wall and floor tile.

Sixtone Collection

Swing Collection

The Swing collection has a moulded format which is the base for decoration. The mood recalls a mix of Op-Art and Art Deco, creating a suggestive dreamlike texture that is bold and confident.

This porcelain stoneware has a concrete effect and is ideal for floors and walls.

Types of Tiles, Slip Ratings

1. Ceramic

2. Porcelain

3. Natural Stone

4. Mosaic

1. Ceramic Tiles (CER, WBODY)

Ceramic tiles are basically a mixture of clays that are pressed into shape and fired at high temperatures, which gives the tile its hardness. Ceramic tiles can be made of red clay, Red Body or white clay, White Body. The biscuit or body of the tile is then glazed. Ceramics are mainly used in domestic situations however high quality ones can be used in certain commercial applications.

2. Porcelain Tiles (POR, GPOR & CBODY)

Porcelain tiles are made from dust pressed clays and have been fired at very high temperatures. Porcelain tiles have a maximum absorption of <.5% and very high mechanical and chemical qualities. This process makes the tile very hard like glass and makes the tile dense and strong. Two main types of Porcelain tile are glazed Porcelain and through-bodied Porcelain. Porcelain tiles have become extremely popular due to their durability, frost resistance and technical characteristics. For CBODY tiles the body is coloured to match the glaze.

3. Natural Stone

These tiles are achieved by cutting or splitting rocks that have been quarried from deposits all over the world. Natural stones are naturally occurring products that are quarried and trimmed into tile formats or special pieces. We are familiar with five different types, although there are many more used in eastern countries. Natural stones are basically tiles that have been cut from the earth. They have formed naturally in the earth and have their own unique characteristics. The natural stones to use are Slates, Sandstone, Limestone, Marble and Granite. All natural stones suit domestic and commercial situations and can be used indoor and outdoor.

(a) Marble - (b) Granite - (c) Slate - (d) Limestone - (e) Sandstone

4. Mosaic

A Mosaic is defined as a collection of small tiles that can be fixed by mesh, paper or wax dot onto a sheet. The tiles can be either face or back mounted onto the supporting sheet. With face mounted sheets, the Mosaics are fixed with the sheet showing. The sheet is removed once the adhesive has dried and the Mosaics are grouted. Mosaics can be glazed Ceramic, unglazed Porcelain, marble, glass or natural stone.

Shade Variations

Tile ranges that are designed with a degree of shade variation both within the tile pattern and from tile to tile are categorised in a range V1 to V4 as below.

- V1 Plain coloured tiles.
- V2 Tiles with a slight variation in colour and or design.
- V3 Tiles with a medium variation in colour and or design.
- V4 Tiles with an intense variation in colour and or design.

LRV Ratings:

Light Reflectance Value measures the proportion of useful light reflected by a coloured object. It represents a relative light and darkness value rather than an actual colour. LRV is a universal value for 'contrast'. The need for the LRV data on commercial projects is to meet the needs of people with vision impairments. Examples where LRV values may be required are floor tiles, wall tiles, sanitary fittings & step thread tiles on stairs.

At btw, we have included this LRV rating on some of our most popular commercial tile ranges. LRV values on our other ranges can be obtained within a few days upon request.
